Partners

(public, private and NGOs)

# The Formats

In this space filled by individual stands of companies offering technological solutions in various sectors (media, banking, mobile communications, hardware, software, etc.), each entity displays its range of services and/or products.

Here the experts are to debate ideas and propose solutions on the universe of information and communication technologies. Discusses issues such as appropriateness of technologies, legislation, production, consumption, infrastructure and inclusion.

Within 12 minutes only, industrialists, experts, entrepreneurs and students will join the stage to stand up for a brilliant idea ... or simply irreverent. The aim is to bring up new thoughts and circular prospects "outside the box" about the world we live in.

This space serves as a laboratory where renowned experts, brands, companies or academics offer technological solutions of high economic or social impact. We want to know the latest trends that make Mozambique vibrate.

The event ends with a gala ceremony, a moment of glitz and glamour, which rewards merit initiatives in the area of services, products, ideas and content, in a range of categories that will be set.
